

Multiple scales for nature conservation in sustainable forest management: Integration and segregation

Webinar: How to integrate segregation in sustainable forest management:
tools, scales and processes
28 September 2020

Program - Sixth meeting of the European Network Integrate

Open event

9:30	Welcome by Chair and Moderator Mads Jensen, Head of Office, Nature, Danish Nature Agency Georg Winkel, Head of Office, EFI Bonn
9:40	How to integrate segregation in sustainable forest management. An overview of the Danish context. Mads Jensen, Head of Office, Nature, Danish Nature Agency
9:50	<i>Keynote speaker:</i> Incorporating 2020 targets, data on species and their ecology in the selection of sites for conservation forest Erik Buchwald, Danish Nature Agency
10:00	<i>Keynote speaker:</i> Forest segregation for conservation: From managed forest to conservation forest. Experiences and challenges Yoan Paillet, National Research Institute of Science and Technology for Environment and Agriculture, France
10:10	<i>Keynote speaker:</i> Forest development after 20-30 year of non-intervention. Reappearance of Old-Growth Elements and associated species. Cases from Belgium Kris Vandekerckhove, Research Institute, Nature and Forest (INBO), Belgium
10:20	<i>Keynote speaker:</i> Speeding up the process: Active vandalism can promote habitat diversity and associated biodiversity in managed forests and recent forest reserves Jacob Heilmann-Clausen, Center for Macroecology, Evolution and Climate, Globe Institute, University of Copenhagen, Denmark
10:30	Questions and moderated discussion
11:30	End of session
